# CRIMSON Suppressor 3581

## **GENERAL DESCRIPTION:**

Suppressor 3581 is a new synthetic technology that affords the end-user a very efficient foam control agent for systems high in starch content such as potato processing. The product can also be used to treat foam found in vegetable washing operations and various other applications.

In food processing, Suppressor 3581 should be used as received. When used in potato processing, the product should be metered into system where foam persists. This product is recommended to be used at levels between 10 – 100 ppm in most applications.

## **PHYSICAL PROPERTIES:**

- ◆ Appearance: Opaque, amber liquid
- ◆ Specific Gravity (20°C): .950 g/ml
- ◆ Flash Point: >280°C

## **APPLICATIONS:**

- ◆ Potato processing
- ◆ Rendering
- ◆ Vegetable Washing
- ◆ Food-Grade Polymers
